Office Action Summary

Information Disclosure Statement

The information disclosure statement filed December 05, 2001 has been considered and has been made of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by McArdle et al (USP 5,411,998).

McArdle et al discloses an anaerobic composition comprising; (i) a room temperature polymerizable (meth)acrylate monomer, (ii) a peroxy-free radical initiator and (iii) an amount effective as an accelerator of a combination of saccharin and at least one onium salt which anticipates the claimed invention. See abstract; col. 1, lines 44-67; cols. 3-5; the examples; the claims.

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited to show the state of the art of anaerobically curable adhesives/compositions; Gruber, Catena, Reich, Friese, Kneafsey, Yang and Fischer.
